

First Announcement

2nd European Congress on Life Science Process Technology

Quality • Formulation • Production • Engineering

Nuremberg 27th to 29th March 2007

in conjunction with

TechnoPharm 2007

The life science markets have been developing dynamically in the past years. Due to the revolution in our health systems and the increasing variety of products enterprises involved in the Life Sciences have been facing a constantly rising pressure regarding regulations, quality, costs and efficiency.

At the 2nd European Congress on Life Science Process Technology the interested person will encounter a highly professional platform and, at the same time, the possibility to gather information about most recent developments especially in the fields of sterile technology, PAT technology and pharmaceutical packaging.

Furthermore, there will be plenty of room for discussion with a wide range of experts.

Don't miss the opportunity of a most versatile and prosperous exchange!

First Announcement

2nd European Congress on Life Science Process Technology

Quality • Formulation • Production • Engineering

Nuremberg 27th to 29th March 2007

Preliminary Programme

Tuesday, 27th March 2007

Sterile technology

Opening speech: How safe are preservation processes?
Prof. Dr. Micha Peleg,
University of Massachusetts, USA

Hygienic design

Dr. Ing. Jürgen Hofmann,
Technical University of Munich
Weihenstephan, Germany

Aseptic processing using barrier technologies

Dr. Otto Ernst Schubert,
F. Hoffmann-La Roche AG,
Basle, Switzerland

Lunch break and poster presentations

Short oral presentations
(submitted abstracts)

Podium discussion with experts
from academia, industry and
authorities

Programme is subject to change

We look forward to meeting you in Nuremberg!

Wednesday, 28th March 2007

PAT and sensor technology

Survey: The electromagnetic spectrum: manifold options for Process Analytical Technology (PAT)
Prof. Dr. Elmar Wagner, Fraunhofer Institute IPM, Freiburg, Germany

Applied process measuring technology

Measuring techniques for process monitoring and quality control
Dr. Annette Braun,
Fraunhofer Institute IPM, Freiburg, Germany

Lunch break and poster presentations

Short oral presentations
(submitted abstracts)

Presentation of sensor technology businesses

Thursday, 29th March 2007

Pharmaceutical packaging

RFID, Tracking and Tracing
Dr. Frédéric Thiesse,
University of St. Gallen, Switzerland

Barrier characteristics of packaging materials

Intelligent packaging
N. N.,
Uhlmann Pac-Systeme GmbH & Co. KG, Laupheim, Germany

Lunch break and poster presentations

Short oral presentations
(submitted abstracts)
