

## **Hans Lindner**

Hans Lindner is a pharmacist and holds a doctorate degree in pharmaceutical technology from Christian-Albrechts-University, Kiel.

He started his industrial career at Arzneimittelwerk Dresden in 1994, where he led a scale up team in formulation development. In 1996, he joined Ferring Pharmaceuticals first in Germany, moving later to Denmark. At Ferring, he served in various positions with increasing responsibilities in formulation and pharmaceutical development, at the end overseeing CMC development.

He joined Schwarz Pharma in 2004, leading pharmaceutical development. After integration into UCB in 2007, he managed the late stage product development function.

In 2008, he joined Bayer, heading pharmaceutical development. In 2012 took responsibility for a newly formed unit overseeing all external activities in pharmaceutical development. Since 2014, he is heading alliance management for research. He leads a global team, developing and running innovative collaboration models with numerous research partners.

During his career, Hans has been working with a wide variety of dosage forms, technologies and delivery systems. He has experience in managing functions, technology and knowledge transfers, as well as internal and external interfaces in different organizations.
