

# Drug Delivery

CV

**Carsten Timpe**, Ph.D., born in Hannover/Germany, studied Pharmacy at the Technische Universität Braunschweig. He completed his Ph.D. thesis at the Philipps University of Marburg/Germany in Pharmaceutical Chemistry in the working group of Prof. Klaus Hartke. Recently he has joined Hoffmann La Roche AG in Basel as a Teamleader Formulation in early drug development projects. Prior to Roche he worked five years as a Senior Fellow and project leader at Novartis AG in Basel in drug development of poorly soluble and highly potent compounds. Further stations of his professional career were Eli Lilly in Hamburg/Germany as Principal Research Scientist until February 2007 in the early drug formulation development area and prior to Lilly he was working at Jenapharm/Schering as group leader in oral solid dosage form development. Dr. Timpe is inventor/co-inventor of several international formulation patents (i.e. for a pulsatile capsule formulation, a buccal tablet) and invited speaker to several drug delivery conferences in Europe and an active member of the APV focus group "Drug Delivery" in Germany.
