**Target Group**

The workshop is primarily designed for pharmaceutical professionals working in drug product development who frequently encounter patent issues, either as inventors of novel formulations or manufacturing processes, or as developers of drug products in the face of substantial third-party IP whose infringement must be avoided. Moreover, the course will be useful for pharmaceutical experts engaged in technology scouting, drug delivery technology development, in-licensing activities and due diligences.

Typical roles of participants include:
- Formulation development scientists/managers
- Drug delivery technology scouts
- Project leaders in (technical/pharmaceutical) drug product development
- Liaison managers working at the interface of pharmaceutical development & IP
- Pharmaceutical experts in licensing & due diligence teams
Intensive patent workshop:
How to draft, analyse and circumvent a formulation patent

Programme

Tuesday, 29 November 2016
10:30 to 18:00 h

Introduction
• The interdisciplinary nature of pharmaceutical IP
• Why your patent attorney needs your help
• How this course will enable you to deal effectively with patent issues

Session 1 - Freedom to operate

Essential knowledge on freedom to operate
• Defining freedom to operate (FTO)
• A pharmaceutical industry perspective on FTO
• FTO: How much at what time in drug development?
• Patent infringement and the doctrine of equivalents
• The pitfalls: Common misunderstandings of scientists and managers

Patent searches for determining freedom to operate
• Product deconstruction techniques
• Beyond IUPAC: The challenge of drug delivery terminology
• Using patent classification: Tricks and limitations
• Patent databases: A practical guide
• Other sources of relevant information
• WORKSHOP EXERCISE: Designing and testing a patent search for a “real” drug product

Evaluating patent search results
• Patent landscapes: What are they good for?
• Coping with high numbers of hits
• How to select the documents that you should really read
• The structure of a patent document
• WORKSHOP EXERCISE: Analysing a pharmaceutical formulation patent
• Taking the legal status of a patent into account
• Forming and communicating technical opinions
• WORKSHOP EXERCISE: Identifying viable circumvention options

Freedom to operate: Putting it all together
• Getting the big picture right
• Risk assessment and risk mitigation
• Crucial follow-up work after an FTO study

Social event
On Tuesday 29 November you are cordially invited to a sightseeing tour of Berlin followed by a dinner. Take advantage of this excellent opportunity to share your experiences with colleagues in a relaxed atmosphere.

Wednesday, 30 November 2016
08:15 to 16:00 h

Session 2 - Obtaining Patent Protection

Beyond NMEs: Protecting pharmaceutical inventions
• The role of patents in life cycle management
• Patentability considerations with an eye on drug formulations, kits, therapeutic uses, and manufacturing processes
• A scrutinising view on prior art
• Inventiveness: Is it what we think it is?
• Other requirements and restrictions
• WORKSHOP EXERCISE: Analysing inventiveness using real pharmaceutical patent cases

Identifying inventions and determining their scope
• A systematic approach to analysing R&D outcome
• How to increase the likelihood of inventions
• Designing experiments to support an invention
• WORKSHOP EXERCISE: Evaluating the results of a formulation screening programme

The making of a patent application
• The team: Who should be involved?
• The art of drafting patent claims
• The underestimated role of the description
• Examples - which ones do you really need?
• Reviewing draft applications: The role of the pharmaceutical expert
• WORKSHOP EXERCISE: Drafting and reviewing patent claims based on “real” R&D data
Intensive patent workshop:
How to draft, analyse and circumvent a formulation patent

From idea to patent grant: The patenting process
• The most important events in the life of a patent application
• How to evaluate search reports
• Replying to an examination report
• WORKSHOP EXERCISE: Reviewing a draft reply to a “real” examination report on a drug formulation-related patent application

Wrap-up and Q&A session
• Clarifications and follow-up discussions
• Key take-home learnings
• Suggestions for further development of your patent skills

Please note that this workshop is limited to 20 participants!

Objectives
This hands-on training course was developed to enhance the patent skills of pharmaceutical professionals who already have a basic knowledge of patents and their role in the pharmaceutical industry. The main objective is to convey advanced practical patent know-how with particular relevance for IP issues regularly occurring in drug product development. The successful participant will be enabled to immediately apply the acquired skills, provide high-quality input to project teams and decision-makers, avoid common pitfalls, and collaborate effectively with in-house or external patent attorneys.

In particular, the successful participant will be able to
• Effectively communicate the technical details of potential inventions and contribute to the evaluation of their patentability
• Provide and/or review high-quality draft patent applications or invention disclosures
• Support the prosecution of patent applications by providing the responsible IP experts with useful technical insights
• Provide correct and relevant input to enable patent search experts to perform meaningful prior art and freedom-to-operate patent searches
• Collaborate with IP experts in interpreting the claims of third party patents and developing viable circumvention options
• Contribute to freedom-to-operate analyses by providing relevant technical expertise based on a solid understanding of the underlying IP issues

Course Leader

Karsten Cremer, PhD, brings in the ideal expertise for leading this patent course. He is a European patent attorney and a pharmaceutical scientist with 20 years of professional experience in the field of drug delivery. Through his intimate knowledge from both sides of the fence, he has become a successful trainer for pharmaceutical professionals who tackle patent challenges relating to drug products, dosage form designs, formulations, kits, and manufacturing methods.

Karsten is the founder and managing director of Pharma Concepts GmbH, a pharmaceutical IP consultancy located in Basel (Switzerland). In previous appointments, he was CEO of Capsulution Nano-Science AG, Director of Oral Drug Delivery at LTS Lohmann Therapy Systems, and Lecturer of Pharmaceutics at the University of Marburg. As a pharmaceutical IP expert, Karsten works with large pharmaceutical companies as well as small and medium-size drug delivery companies. His specialties include IP issues relating to pharmaceutical formulations and drug delivery technologies. In addition to drafting, filing and prosecuting patent applications, he is experienced in opposing and defending patents, developing and implementing tailor-made patent strategies, managing patent portfolios, establishing patent landscapes, performing freedom-to-operate analyses, and conducting technical and IP due diligences.

Karsten is an experienced speaker and tutor with a proven track record of success within the APV and other professional organisations. He is also founder and member of the APV Drug Delivery Focus Group.
**Registration**

As soon as you have found a seminar of your interest, it is very easy to register for it via fax, e-mail or online. We will process your registration promptly and certainly are available for any questions that may arise.

**Registration confirmation**

After your registration was successfully processed, you will receive a confirmation.

**Before the event**

A few days before the event starts, you will receive important information about the seminar, such as time, date, addresses etc.

**After the event**

You will receive a certificate confirming your participation. Furthermore, we would like to ask you to fill-in our evaluation sheet to make sure we get better every time.

**Follow-up**

After the event, we are open to receive any suggestions and critique that might arise during the seminar and will certainly help you with further questions you may have.

**Hotel reservation**

Leonardo Royal Hotel Berlin
Otto-Braun-Str. 90
10249 Berlin, Germany
Telefon: +49 (0) 30 755430-0
Telefax: +49 (0) 30 755430-810

Participants should make their own hotel reservation referring to the APV seminar.

Deadline for special conference rate: 31 October 2016.

Special rate: Single room incl. breakfast buffet from 89 EUR per night.

Mainz, December 2015

**Registration by fax +49 6131 9769-69**
